Overview

ABSTRACT

As wholesale and retail trade of goods has a significant contribution to the economy of the country, the Distributive Trade Survey of Nepal 2008 was implemented with the aim of providing reliable information on wholesale and retail trade to policy makers and planners for understanding the structure, contribution and other aspects of wholesale and retail trade in Nepal. Apart from that, this survey is considered as a benchmark survey for assessing the contribution of wholesale and retail trade to the national economy.

The survey collects:

Intermediate consumption, stocks and other economic data relating to wholesale collect information such as employment, compensation of employee, income, and retail trade that are required for national accounts purpose; estimate trade margins by some major commodities, and analyze the data and disseminate to the policy makers, planners, researchers, businessmen and other users.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Trade establishments (wholesale and retail)

Scope

NOTES

This survey collected information on wholesale and retail trade of goods envisaged under Major Division G of NSIC. However, the service parts of this group (repair of motor vehicles, motorcycle and personal and household appliances) have been excluded from this survey.

Coverage

GEOGRAPHIC COVERAGE (1)

National

GEOGRAPHIC COVERAGE (2)

Urban / rural areas

UNIVERSE

All trade establishments operating in the country, having registered in any government unit were covered in this Survey. A trade establishment is an economic unit engaged in wholesale or retail trade of goods within the national territory under a single ownership or control, i.e. under a single legal entity at a single fixed location. In other words, a trade establishment is an establishment having three characteristics: economic activity (trading), legal status (registered one) and fixed location (housed in fixed structure).

Sampling

Sampling Procedure

The survey is a random sample survey and the sampling frame was constructed from the lists of all establishments. At first, the listing operation of the establishment was conducted all over the country and, nearly 59,000 trade establishments were listed in the country.

The Distributive Trade Survey (DTS) used stratified random sampling. Altogether there were 24 strata and stratification of all establishments listed in the country was done by rural/urban by NSIC two digits of wholesale and retail trade (50, 51 and 52) and by annual transactions. The stratification based on annual transaction was done as follows:

- (i) Less than Rs. 281,000
- (ii) Rs. 281,000 - Rs. 540,000
- (iii) Rs. 540,001 - Rs. 1,200,000
- (iv) More than Rs. 1,200,000.

The samples were selected randomly from each stratum and around 2955 establishments were selected for enumeration. Out of which, 2843 establishments were enumerated and all estimates given in this report are based on those establishments.

A detailed discussion on the sampling design of the survey can be found Annex B the report titled 'Distributive Trade Survey of Nepal, 2008 A Statistical Report'.

Response Rate

The number of sample establishments successfully interviewed was 2,843 of 2955, or 96.20%.

Weighting

the weight variable is available data files of DTS 2008. The derivation of the weights, however, was not discussed in the statistical report.

Questionnaires

Overview

The questionnaire contained fourteen sections. The contents of the questionnaire are as follows:

- Section 1. General Information
- Section 2. Legal Status
- Section 3. Major Trading Activities
- Section 4. Types of Trade
- Section 5. Employment, Salaries and wages and other facilities
- Section 6. Fixed Assets
- Section 7. Sales and Purchases of Goods
- Section 8. Other Incomes
- Section 9. Operating Cost
- Section 10. Stocks
- Section 11. Tax paid
- Section 12. Financial Transaction
- Section 13. Problems/ Constraints

Data Collection

Data Collection Dates

Start	End	Cycle
2007-07-16	2008-07-15	N/A

Time Periods

Start	End	Cycle
2007-07-16	2008-07-15	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

Altogether, seven training programs were conducted. Out of which, four were for enumerators, two for supervisors and one for branch statistical officers. Nearly 150 staffs, including 33 branch statistical officers, were trained on different aspects of the DTS.

The data collection of the distributive trade survey was done by the staffs of the branch statistical offices (BSOs) located at 33 districts. Direct interview method was used for data collection and around 120 enumerators were involved for this purpose. Due to heavy workload in Kathmandu valley, the staffs from CBS were also fielded for data collection.

The survey covered a complete period of 12 months.

Questionnaires

The questionnaire contained fourteen sections. The contents of the questionnaire are as follows:

- Section 1. General Information
- Section 2. Legal Status
- Section 3. Major Trading Activities
- Section 4. Types of Trade
- Section 5. Employment, Salaries and wages and other facilities
- Section 6. Fixed Assets
- Section 7. Sales and Purchases of Goods
- Section 8. Other Incomes
- Section 9. Operating Cost
- Section 10. Stocks
- Section 11. Tax paid
- Section 12. Financial Transaction
- Section 13. Problems/ Constraints

Data Collectors

Name	Abbreviation	Affiliation
Central Bureau of Statistics	CBS	National Planning Commission
Branch Statistics Office	BSO	Central Bureau of Statistics

Supervision

To maintain the quality of the data, the field supervision was managed with 33 branches statistical officers in their jurisdiction. In addition, the officers from central office also made frequent visits to the field in order to supervise and check the questionnaires in the field itself to minimize errors during the data collection.

There were 33 supervisors, all Statistical Officers of Branch Statistics Offices.

Data Processing

Data Editing

Data editing took place at a number of stages throughout the processing, including:

- a) Office editing and coding - inhouse (CBS)
- b) During data entry inhouse (CBS)
- c) Structure checking and completeness - inhouse (CBS)
- d) Secondary editing - inhouse (CBS)
- e) Structural checking of SPSS data files - inhouse (CBS)

Other Processing

The Software CSPro was used for Data Entry, and SPSS Package for the survey result.

Description

A trade establishment is an economic unit engaged in wholesale or retail trade of goods within the national territory under a single ownership or control, i.e. under a single legal entity at a single fixed location. In other words, a trade establishment is an establishment having three characteristics: economic activity (trading), legal status (registered one) and fixed location (housed in fixed structure).

Reports

Distributive Trade Survey of Nepal 2008, Report

Title	Distributive Trade Survey of Nepal 2008, Report
Author(s)	Central Bureau of Statistics (CBS)
Date	2009-11-01
Country	Nepal
Language	English
Description	This report comprises general information about the distributive trade survey and major findings of the survey. The survey stands as a benchmark for wholesale and retail trade sector and the information available in the report would be useful for decision makers and planners to formulate appropriate polices for the development of the trade sector in the country.

Preface
 List of Tables
 List of Figures
 Acronyms

1. Introduction of the Survey

1.1 Background
 1.2 Objectives
 1.3 Scope and Coverage
 1.4 Limitation of the survey
 1.5 Reference period
 1.6 Survey methodology
 1.7 Data items
 1.8 Training
 1.9 Field operation
 1.10 Data processing

2. Summary of the findings

Table of contents 3. Results of the survey
 3.1 Establishment
 3.2 Employment
 3.3 Compensation of Employees
 3.4 Trade Margin
 3.5 Other Receipts
 3.6 Intermediate Consumption
 3.7 Fixed Assets
 3.8 Stock
 3.9 Tax and Fee
 3.10 Financial Transaction
